

MKC CONCEPT EXTERIOR TAKES BEAUTIFUL AND ELEGANT DESIGN A STEP FURTHER

The Lincoln MKC Concept is one more signal that the Lincoln Motor Company intends to become a major contender in the premium market. This all-new vehicle previews Lincoln's entry into the fast-growing global small premium utility segment while building on the launch of the all-new MKZ midsize sedan.

The MKC Concept further establishes the Lincoln Design DNA of beautiful and elegant vehicles that are warm, open and inviting.

This has long been a core element of the brand's heritage and is now reinterpreted in a fresh, contemporary way.

Split-wing grille: A Lincoln signature since the famed Zephyr of the 1930s, the modern execution defines the new face of Lincoln that debuted on the MKZ.

Sculpted hood: The sculptural execution of the hood surface is amplified by the high-end cream-based color, which features a tri-metallic coat.

LED lighting: More efficient than standard lights, this technology allows for a thin design and signature execution.

Muscular beltline and shoulder: A continuous character line joining two strong muscular shoulders defines the side view of the MKC Concept, communicating strength and athletic grace.

The sleek silhouette, athletic stance and refined proportions are communicated through the sculpted body, wheel arches and elegant shoulders.

Clamshell liftgate: The liftgate design is executed with a Lincoln-first side-view cutline. This treatment creates a highly crafted rear-view appearance that maximizes Lincoln signature full-width taillamps.

Sleek roofline: The panoramic glass on the flowing roofline continues the practice of being warm and open.

Wheel arches: Muscular wheel arches frame the stance and accentuate the capability.

Premium wheels and tires: 20-inch premium painted wheels with polished aluminum rims add to the sporty, yet elegant, appearance.

SPACIOUS, SPIRITED, DARING PRESENCE HIGHLIGHTS MKC CONCEPT INTERIOR

The Lincoln MKC Concept's interior achieves visual width and a feeling of openness with architectural instrument-panel graphics and an implied flowing center console design. Unique colors and materials complemented by a precisely crafted interior design further enhance the experience.

Premium surfaces: Seats and pillars are wrapped in smooth premium leather. An embroidered Lincoln Star and crimson stitches highlight the seats. Lattice pattern embroidery is featured throughout.

Elegant chrome and wood jewelry: Appliqués are cut from layers of reconstructed natural wood infused with a metallic flake. The chrome air register's shape echoes the exterior's front-end graphics.

Spacious, sophisticated storage: Chrome-accent cargo pads and a repeating embroidered Lincoln Star lattice highlight the clean, open space. The cargo area is wrapped in soft leather.

Innovative signature shifter: The MKC Concept's distinctive push-button gear shift selector optimizes space by eliminating the bulky traditional console shifter. It also increases console stowage space.

Lincoln MKC Concept basic dimensions	
Wheelbase	106.9 in./2,717.2 mm
Overall length	179.3 in./4,550 mm
Width without mirrors	76.1 in./1,932.6 mm
Width with mirrors	80 in./2,032.3 mm
Height	63.2 in./1,607.1 mm
